

Agent42

5-Minute Demo - Speaker Notes

Presenter (speak): ALI Laptop / demo steps: MAHDHI

Before you start (2 minutes) - MAHDHI

- Open 5 tabs, already signed in (no logins on stage):
 - 1) Chat localhost:3000/chat
 - 2) Mobile localhost:3000/mobile
 - 3) Rescheduling localhost:3000/rescheduling
 - 4) Officer console localhost:3000/admin/rescheduling
 - 5) Intelligence localhost:3000/admin/intelligence
- Citizen login: Mariam Al Mansouri -> 784-1990-1181000-4 (cross-channel history + hardship loan).
- Admin password: admin | API running with --env-file .env (briefings = live AI).
- Pre-type the chat message and the briefing input. On stage you ONLY press Enter / click.

Timing (keep to 5:00)

- Problem 0:50 | Cross-channel 1:10 | Officer 1:30 | Leadership 0:45 | Close 0:45

0:00-0:50 ACT 0 - The Problem (slide only, no screen)

ALI - SAY

Meet Mariam - a UAE citizen. Recently she hit a hard moment: she needs the Ministry's support to keep benefiting from her housing service.

ALI - SAY

Today, her only option is to reach out - so she calls the contact centre. She waits. She spends over FORTY MINUTES explaining her whole situation. The call ends with no decision - just 'we'll get back to you.'

ALI - SAY

Days pass. No update. So she tries again, this time on WhatsApp - and has to explain everything from scratch. Different channel, zero memory, same frustration. That is how a citizen's trust turns into anxiety.

ALI - SAY

The problem isn't the service. It's the FRAGMENTATION - every channel forgets her, and every decision waits for a human. This is where Agent42 comes in.

ALI - SAY (with energy)

Agent42 is one intelligent layer for the Ministry: it remembers Mariam everywhere, it decides like an officer in seconds, and it even advises leadership. Let me show you.

MAHDHI - DO

Stay on the title / problem slide. Have the CHAT tab ready to bring up.

0:50-2:00 ACT 1 - One brain, every channel

MAHDHI - DO

Switch to the CHAT tab (already signed in as Mariam).

ALI - SAY

Mariam opens the assistant and simply asks about her request.

MAHDHI - DO

In Chat, send the pre-typed message: "What's the status of my request?" (press Enter)

ALI - SAY

Notice - she never introduced herself. Agent42 already knows her from her verified identity, pulls her UNIFIED PROFILE, and answers with her real case, the exact status, and the SLA - then closes it autonomously. No agent, no hold music.

MAHDHI - DO

Switch to the MOBILE tab.

ALI - SAY

She moves to the mobile app - and the conversation is ALREADY THERE, continuing across channels. She never repeats herself again. One identity, one memory, every channel.

2:00-3:30 ACT 2 - An autonomous officer, in seconds

ALI - SAY

Now her real need: she's fallen behind on her housing loan and needs it rescheduled. Today that is a FIVE-DAY manual review. Watch Agent42 do the officer's job.

MAHDHI - DO

Switch to the RESCHEDULING tab (/rescheduling).

ALI - SAY

It retrieves her loan and arrears AUTOMATICALLY - no forms. She uploads her salary certificate, confirms it's authentic, and submits.

MAHDHI - DO

Click 'Upload certificate' (pick any file) -> tick the authenticity box -> click Submit.

ALI - SAY

In SECONDS - a decision. Because her income is strained, Agent42 does NOT raise her instalment - it moves the arrears to the END of her loan, keeping her within the 20% deduction rule and the original loan period. And it explains exactly why.

MAHDHI - DO

Switch to the OFFICER tab (/admin/rescheduling).

ALI - SAY

And it's GOVERNED. Every decision lands in the officer's console - here, 86% auto-decided, with confidence scores, policy-compliance checks, and a full audit trail. Humans handle only the exceptions. Five days becomes seconds - fairly, transparently, consistently.

3:30-4:15 ACT 3 - A strategic advisor for leadership

ALI - SAY

Agent42 doesn't stop at citizens - it serves LEADERSHIP too. Imagine a minister has a meeting with Germany on green hydrogen in fifteen minutes.

MAHDHI - DO

Switch to the INTELLIGENCE tab (/admin/intelligence) -> pick Germany -> 'Prepare me for a meeting' tab -> input already says 'green hydrogen offtake' -> click Generate briefing.

ALI - SAY

Instantly - an EXECUTIVE BRIEFING: talking points, opportunities, risks, recommended actions, even smart questions to ask - grounded in trusted data, in Arabic or English. Meeting-ready in seconds instead of days of preparation.

4:15-5:00 ACT 4 - Impact & Close

MAHDHI - DO

Switch to the closing slide (or the Executive Dashboard).

ALI - SAY

So what did Mariam's day become?

- 40 minutes of repeating -> ZERO. One identity, remembered across every channel.
- A 5-day wait -> an instant, explainable, GOVERNED decision.
- The same intelligence that served Mariam also prepares the Ministry's leaders for the world stage.

ALI - SAY

Every interaction is logged for full transparency and the right to explanation. And it's bilingual and accessible by design - including for people of determination.

ALI - SAY (with energy)

Agent42 isn't a chatbot. It's the Ministry's intelligence layer - turning fragmented, slow, manual service into one experience that is INSTANT, FAIR, and HUMAN. Thank you.

If something stalls (both of you)

- Ali: narrate over it - '...and while that resolves...' - never go silent.
- Mahdhi: keep every tab pre-loaded; don't navigate fresh on stage; only press Enter on pre-typed inputs.
- If a tab errors: hard-refresh once (Cmd+Shift+R) and continue; have a backup screenshot ready.
